

Recognition for a job well done.

"I have had the opportunity to work with Bill on complex projects on numerous occasions. Bill's expertise as an integrator across multiple fields demonstrates the unique range of his consulting abilities. He has repeatedly demonstrated his expertise with his operational risk management capabilities, deep understanding of engineering, scientific and business disciplines, analysis of organizational systems and subsystems to provide the client with the best suitable solution set. I highly recommend Bill to anyone seeking his vast range of skills, abilities, deep knowledge and professionalism."

"I've worked with Bill professionally on multiple programs since 2003. His expertise in dividing a process into sub-components to display the physical and operational engineering requirements supporting a problem or R&D project is remarkable. His focused integration of team members having multiple disciplines to specifically identify requirements and assist with cross functional demands of engineering fundamentals supporting the process or technologies is productive, goal oriented and highly regarded."

"Bill is an excellent project manager. When in charge of large projects with many people, often with strong opinions, he was able to keep the team on track and the client happy. His understanding of the culture is an asset when dealing with the military."
